ON BOARD OF YOUR YACHT:

STREAM LIKE YOU'RE AT HOME

Fast internet

The Smart Yacht "Stream like you're at home" Solution offers you the unique combination of a professional router, the Smart Yacht app and a Mondicon SIM card. Together, they give you a fast and stable internet experience Europe-wide, up to 10 miles from the coast.

The Mondicon router combines up to 4 SIMs via bonding technology, connecting to all triple-A networks throughout Europe.

Security camera

The camera system allows you to check what's happening on your boat from home, via real-time vision and monitoring software on your computer, smartphone or tablet. Anytime, anywhere.

- Stay in total control all the time. Whether you're using a smartphone, tablet, TV, or computer, a click or two is all you'll ever need to check in. The free app is available for iOS, Android, AppleTV, and web browsers.
- The cameras are weatherproof so you can place them anywhere-indoors and out.
- Built-in mic and speaker enable push-to-talk capability, so you can listen in and talk back.

Track & Trace

Geo-fencing makes use of a GPS system. If your yacht is equipped with a location-based service (LBS) or a location-aware device and it enters or leaves an area surrounded by a geo-fence, an alert is generated. This alert contains information about the location of the yacht and is sent to a mobile telephone or email address.
